BAE Systems Apprenticeships

DISCOVER CRAFT ENGINEERING APPRENTICESHIPS AT BAE SYSTEMS

Could you build a fantastic future through hands-on experience at one of our innovative sites across the UK? You'll get to work on cutting edge projects – assembling the advanced technology that keeps our armed forces safe. Discover if this could be a perfect fit for you.

About our craft engineering apprenticeships

Anything is possible when you bring the different parts together. If you're hands-on and curious about how things work, then a craft engineering apprenticeship could see you creating the technology of tomorrow piece by piece.

By developing skills in areas such as electrics, welding, or aircraft fitting, you'll keep people safe by assembling and maintaining everything from state-of-the-art aircraft to submarines.

Building a future perfect for you

As an apprentice, you'll gain valuable work experience, develop skills and be supported in your study towards professional qualifications – all whilst earning a salary. Our apprentices receive support from managers and mentors who are dedicated to helping them make the most of their programme. With an average of 2,000 apprentices in learning, you'll be joining others who'll become great colleagues and friends for life.

Who we are

At BAE Systems we serve, supply and protect all those who serve and protect us. Ours is a culture that values diversity, rewards integrity and merit, and is a place where everyone has the opportunity to fulfil their potential, no matter what their background.

Making a difference

At BAE Systems, we're not just proud of what we do, we're proud of how we do it. So, when you join us, you'll be part of an inclusive culture that's committed to working to the highest ethical and environmental standards, making a positive contribution to the countries and communities in which we operate.
